Introducing RAPTOR

RAPTOR (or Really Awesome Plan To Obtain Renewables) is the revolutionary new certificate creation solution by Wattly Pty Ltd. With a real-time review of data collection by our back-office staff, RAPTOR simplifies the creation of all forms of certificates (energy efficiency, renewable energy, carbon).

Coming soon to browsers

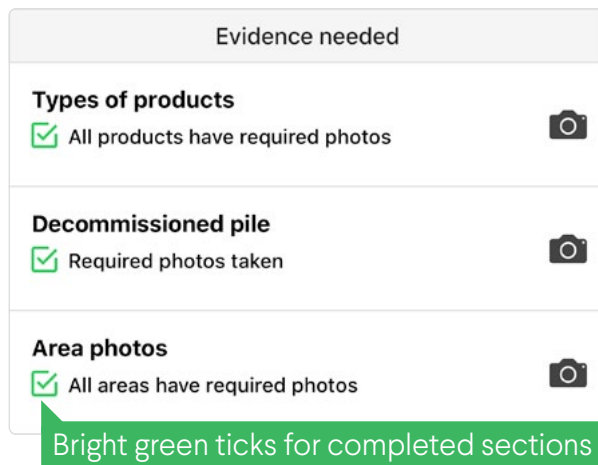

Real-Time Collaboration

Jobs can be remotely monitored from a desktop computer. See what photos have been taken in real-time.

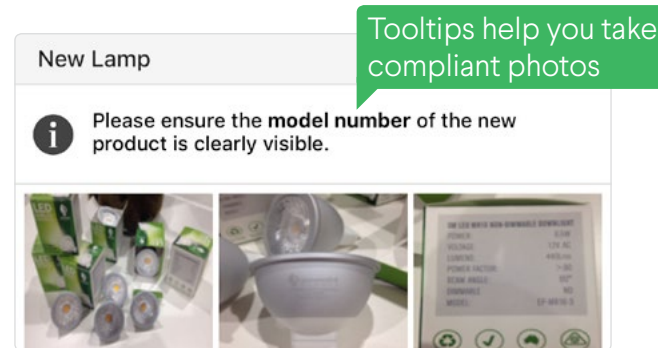

Simplified Data Collection

RAPTOR streamlines the collection of evidence, letting you quickly complete jobs on site.

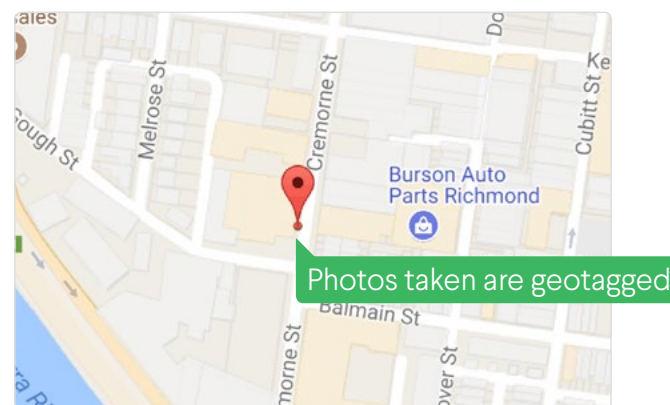

Geotagged Photos

RAPTOR ensures that any photos taken using the App are geotagged, in accordance with the scheme requirements.

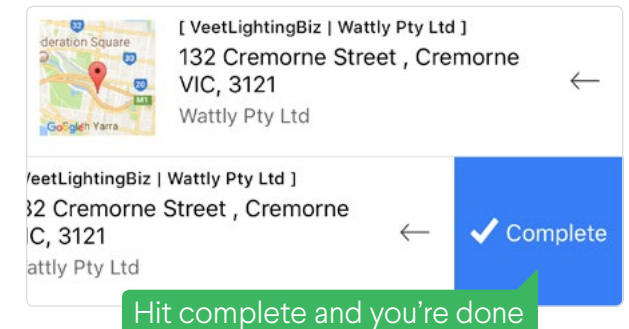

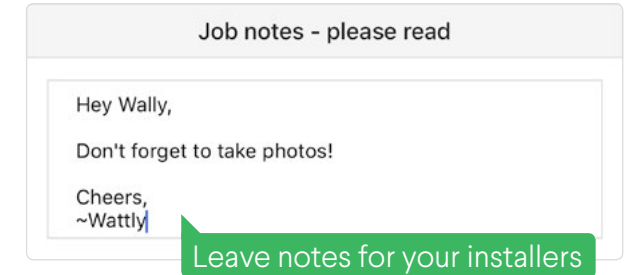

Remote Upgrade Manager by Wattly

Wattly can remotely assist you by acting as the Upgrade Manager where we can check RAPTOR jobs even when you are still on site.

Get Paid Faster

Submit your job when done and we'll pay you within one week of you submitting the complete set of correct paperwork.

API Integration

RAPTOR is powered by a well-documented REST API which can be integrated with various systems.
